Description

## **Audio cassette blank C90 - Type I - RTM**

Our story begins in May 2016.

Global cassette consumption is on the rise and magazines report 80% growth.

Additionally, independent artists and labels are releasing new albums on cassettes. What a great opportunity, we thought.

Many audiophiles, partners and friends have asked our factory to develop compact cassettes as previous brands did in the past.

We knew it wasn't going to be an easy journey. It didn't matter, there were many discussions and debates, and in the end we decided to manage the project.

The main issues we faced were the difficulties in finding raw materials, chemical formulas and people's know-how.

The truth is that we were desperately looking for something useful. We had everything we needed in front of us.

What if we could use our most popular formulas to create brand new crates?

After performing a series of chemical tests and changing the formula, the SM900 gave unexpected results.

We decided to produce several batches to get the first samples to be tested and shared with our potential partners
